

UX Testing + UI Iteration

		User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying? (ex: sounds, hover effects, press effects, etc.)
User 1 Name: Liyah	<ul style="list-style-type: none">Fix the gap when you make it smaller.Add drop shadow to the trees and plates.•	<ul style="list-style-type: none">Making the food move all the way off the screen.Change the media query to 600.Add audio to the clicking effects.	
User 2 Name: Desmond	<ul style="list-style-type: none">Remove the scroll bar function on the bottom.Good image quality and idea behind the website.•	<ul style="list-style-type: none">Add instructions on what to do to make the experience more understandable.••	
User 3 Name: Justin	<ul style="list-style-type: none">Make the flowers pop out more/drop shadow••	<ul style="list-style-type: none">Add instructions on what to do to make the experience more understandable.Add function to the food so that you can eat it.	
User 4 Name: Sophie Owens	<ul style="list-style-type: none">The buttons and decorations are really cute! Maybe find a way to make some of the photos less blurry.They don't have to be clickable, but maybe add some shadow to the sushi plates on the conveyor belt.Maybe add some text instructions or give the restaurant a name	<ul style="list-style-type: none">Make the sushi on the bottom half clickableAdd sound effects to make the page more funMake a reset button to bring the sushi on the conveyor belt back into view.	
User 5 Name: Auria	<ul style="list-style-type: none">Remove scroll bar and remove gapsMake the elements stand out maybe make them brighter or add more shadowingIts really cute	<ul style="list-style-type: none">Maybe add sound effectsAdd a reset button so it goes back to the loading screenAdd instructions on how to use it	

UI Before Feedback (Screenshot / GIF)

What trends did you identify in your feedback?

- Add more drop shadows to make the images stand out more.
- Add instructions to make the website functions more understandable.
- Add more sound effects to the sushi
- Add a function to the sushi on the bottom half
- Remove scroll bars and remove the gaps

UI After Feedback (Screenshot / GIF)

What changes did you make to improve your UI?

- Fixed the responsiveness and made the media query 600px and fixed the gap that was created in the background when changed to 600px.
- Add the move back function on the red sushi on the bottom half of the screen.
- Added drop shadows to the sushi on the conveyor belt.
- Changed the transform scale to make it bigger so that it pops out more when hovered on.
- Added munching sound effects to the bottom red sushi
